DETAILED ACTION***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species: **figure 1; figure 8; figure 13; figure 17.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no independent claims are generic claims.

- a. In the event **Specie figure 1** is elected, **Specie figure 1** is subject to the following additional restriction requirement:

Specie figure 1 contains claims directed to the following patentably distinct **sub-species I** of the claimed invention: Species: **figure 2; figure 3.**

Specie figure 1 contains claims directed to the following patentably distinct **sub-species II** of the claimed invention: Species: **figure 5; figure 7.**

- b. In the event **Specie figure 8** is elected, **Specie figure 8** is subject to the following additional restriction requirement:

Specie figure 8 contains claims directed to the following patentably distinct **sub-species** of the claimed invention: Species: **figure 9; figure 10; figure 11; figure 12.**

- c. In the event **Specie figure 13** is elected, **Specie figure 13** is subject to the following additional restriction requirement:

Specie figure 13 contains claims directed to the following patentably distinct **sub-species** of the claimed invention: Species: **figure 15; figure 16.**

- d. In the event **Specie figure 17** is elected, **Specie figure 17** is subject to the following additional restriction requirement:

Specie figure 17 contains claims directed to the following patentably distinct **sub-species** of the claimed invention: Species: **figure 20; figure 21**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species including single sub-species under it for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Lin Ye** whose telephone number is **(703) 305-3250**.
